

School Vision

Excellence

- Student midwives learning how to fear and reverence God as the Hebrew midwives did.
- Midwives trained in such a way that they are sought out by individuals around the world for their level of experience and skills.
- Material presented in school is God honoring, Christ centered, and high quality.

Training

- Fluently understand and use medical terminology. Offers ease of access when conversing with medical personnel and others who may need to care for the mother and baby
- Understand and use herbs and natural remedies to assist the mother in the birthing process for reduced pain and healthier results for the mother and baby.
- Study the Word. Memorize scripture, train in the reading and understanding of the Word, cultivate a deep, personal relationship with Jesus Christ, and build true identity and purpose in Christ.
- Prepare for emergencies. Learn the basic emergency response skills to comfort and provide for the mother and baby during unexpected situations that may occur.
- Work with the family to create a peaceful birthing atmosphere. Provide the father with information to lead his wife through the birthing process. Encourage the whole family in healthy eating habits, building strong relationships, and working together during and after the birth.
- Business skills. Use midwifery to build family economy as student midwife works with family or husband.

Mentoring

- Place students with established midwives for training.
- Providing the students with a network of individuals who can support and encourage them while attending school and long after they have graduated.
- Training up Handmaidens to be future midwives.
